ENERGY POLICY

Index to Volume 18

January/February, March, April, May, June, July/August, September, October, November, December 1990

Articles – titles

Coal

Acid deposition regulation and the US coal industry. *Charles D. Kolstad*. 18.9, 845–852

Coal policies and trade barriers. *R.P. Steenblik and K.J. Wigley*. 18.4, 351–367

Developing countries

Climatic concerns: possible energy implications for selected lower income Asian nations. *William Barron and Peter Hills*. 18.9, 819–827

Consumption of fuelwood and other household cooking fuels in Indian cities. *J. Dunkerley, M. Macauley, M. Naimuddin and P.C. Agarwal*. 18.1, 92–99

Energy and environmental consequences and prospects: Taiwan's miracle. *Bert de Vries*. 18.10, 949–961

Iron and charcoal: the industrial fuelwood crisis in Minas Gerais. *Frank Ackerman and Paulo Eduardo Fernandes de Almeida*. 18.7, 661–668

Non-utility captive generation for power sector planning in India. *S. Ramesh, Kapil Thukral and Bindu Kaul*. 18.9, 853–860

Urban fuelwood: challenges and dilemmas. *John Soussan, Phil O'Keefe and Barry Munslow*. 18.6, 572–582

Electricity

Electric power in the Comecon European countries. *Vladimir I. Voloshin*. 18.8, 740–746

Obstacles to rational electricity use and measures to alleviate them. *Eberhard Jochem and Edelgard Gruber*. 18.4, 340–350

Opening access to European grids: in search of solid ground. *Dominique Finon*. 18.5, 428–442

Price equalization and alternative approaches for rural electrification. *Jean-Charles Hourcade, Michel Colombier and Philippe Menanteau*. 18.9, 861–870

Variable electricity prices for aluminium smelting in northwestern USA. *Paul Spies*. 18.2, 162–169

Energy and the environment

Acid rain deposition regulation and the US coal industry. *Charles D. Kolstad*. 18.9, 845–852

Climate change and the need for a new energy agenda. *Myles R. Allen and John M. Christensen*. 18.1, 19–24

Climatic concerns: possible energy implications for selected lower income Asian nations. *William Barron and Peter Hills*. 18.9, 819–827

Reducing conflict in global warming policy: the potential of equity as a unifying principle. *Adam Rose*. 18.10, 927–935

Effects of future fossil fuel use on CO_2 levels in the atmosphere. *C. Anastasi, R. Hudson and V.J. Simpson*. 18.10, 936–944

Energy, environment and development: some directions for policy research. *David B. Brooks and Hartmut Krugmann*. 18.9, 838–844

Energy policy and public opinion: manipulation of environmental threats by vested interests in the UK and West Germany. *Sonja A. Boehmer-Christiansen*. 18.9, 828–837

Quantifying and comparing fuel-cycle greenhouse-gas emissions: coal, oil and natural gas consumption. *Deborah Wilson*. 18.6, 550–562

Slowing global warming and sustaining development: the promise of energy efficiency. *Gregory H. Kats*. 18.1, 25–33

The air quality debate in California: should gasoline be banned? *Gregory P. Nowell*. 18.7, 652–660

The conflict between energy conservation and environmental policy in the US transportation sector. *J. Daniel Khazzoom, Michael Shelby and Rob Wolcott*. 18.5, 456–458

The contribution of efficient energy pricing to reducing carbon dioxide emissions. *Joanne C. Burgess*. 18.5, 449–455

The environmental challenge and the impact on the oil industry. *Nay Htun*. 18.1, 5–10

The relative cost effectiveness of various measures to ameliorate global warming. *D.M. Donaldson and G.E. Betteridge*. 18.6, 563–571

The scientific challenge of measuring climate change: global warming and its energy implications. *Volker A. Mohnen, Walter Goldstein and Wei-Chyung Wang*. 18.7, 641–651

Thinking economically about climate change. *Edward B. Barbier and David W. Pearce*. 18.1, 11–18

Transport and energy policies: only connect. *Stewart Boyle*. 18.1, 34–41

Energy conservation and efficiency

Adding uncertainty to least-cost planning: a case study of efficiency standards in the Northwest. *Andrew Ford and Jay Geinzer*. 18.4, 331–339

Conservation screening curves to compare efficiency investments to power plants. *Jonathan Koomey, Arthur H. Rosenfeld and Ashok Gadgil*. 18.8, 774–782

Slowing global warming and sustaining development: the promise of energy efficiency. *George H. Kats*. 18.1, 25–33

Energy policy analysis

An assessment of UK North Sea oil and gas policies: twenty-five years on. *Alexander G. Kemp*. 18.7, 599–623

Avoided cost contracts can undermine least-cost planning. *Stephen Bernow, Bruce Biewald and Donald Marron*. 18.7, 624–630

Beyond 1992: the single market and EC energy issues. *John Surrey*. 18.1, 42–54

Energy policy of the Bush administration. *W. Henson Moore*. 18.1, 2–4
New directions in integrated regional energy planning. *Peter Nijkamp and Andreas Volwahsen*. 18.8, 764–773
Norwegian gas exports: past policy, current prospects and future options. *Jonathan P. Stern*. 18.1, 55–60
Obstacles to rational electricity use and measures to alleviate them. *Eberhard Jochem and Edelgard Gruber*. 18.4, 340–350
Recent changes in the power equipment industry and the opening up of public procurement markets in the EEC. *Augusto Ninni*. 18.4, 320–330
Tax harmonization for petroleum products in the EC. *Jean Pierre Angelier and Thomas Sterner*. 18.6, 500–505
The contribution of efficient energy pricing to reducing carbon dioxide emissions. *Joanne C. Burgess*. 18.5, 449–455
The internal energy market: the new coalition against energy efficiency and environmental concerns? *Michael Brand and Eberhard Jochem*. 18.8, 694–701
The UK energy debate in the 1980s: ceasefire or new consensus? *Matthew R. Jones*. 18.4, 381–388
Towards a free market for energy? A legal perspective. *Leigh Hancher*. 18.3, 233–245
Towards an effective oil conservation policy: a case study for OPEC. *Mohamed Shams*. 18.5, 443–448
Transport and energy policies: only connect. *Stewart Boyle*. 18.1, 34–41

Energy supply and demand

Energy price shocks and productivity slowdown. *David O. Wood*. 18.1, 61–65 and 18.3, 307
Freight transport and energy policy: an application to the Queensland freight task. *Jim McGovern and Ian Lowe*. 18.5, 459–470
India's oil policy: to import crudes or products? *Kapil Thukral*. 18.4, 368–380
Matching petrol and diesel fuel demand in South Africa. *K.F. Bennett*. 18.3, 255–266
Oil prices in the short, medium and long-term. *Fereidun Fesharaki*. 18.1, 66–71
Regional energy trade: its role in South America. *Alfredo Behrens*. 18.2, 175–185
The future of world oil prices: smooth growth or volatility? *Franz Wirl*. 18.8, 756–763

National energy profiles and government policy

Delinking of energy consumption and economic growth: the German experience. *Ulf Hansen*. 18.7, 631–640
Energy policy of the Bush administration. *W. Henson Moore*. 18.1, 2–4
In the aftermath of the energy crisis: New Zealand's energy policy in the 1970s and 1980s. *Stephen C. Lonergan and Chris Cocklin*. 18.1, 100–116
Planning for the energy sector in Ghana: emerging trends and experiences. *J.K. Turkson*. 18.8, 702–710
Trends in fuel and energy use and programmes for energy conservation by economic sector in the USSR. *Albina Tretyakova and Matthew J. Sagers*. 18.8, 726–739
US energy security: problems and prospects. *Ira Sohn*. 18.2, 149–161

Nuclear power

A critical review of nuclear power plant decommissioning planning studies. *W. Timothy Lough and K. Preston White Jr*. 18.5, 471–479
Comecon nuclear power plant performance: a comparison with the USA and Japan. *Steve Thomas*. 18.6, 506–524
Diversion-resistance criteria for future nuclear power. *R.H. Williams and H.A. Feiveson*. 18.6, 543–549
Implementing nuclear energy policy in Japan: top-down and bottom-up perspectives. *S. Hayden Lesbirel*. 18.3, 267–282
Operating performance of nuclear reactors in the non-communist world. *S.D. Thomas*. 18.10, 888–912

Oil and Gas

An assessment of UK North Sea oil and gas policies: twenty-five years on. *Alexander G. Kemp*. 18.7, 599–623
A study of leakage from the UK natural gas distribution system. *Catherine Mitchell, Jim Sweet and Tim Jackson*. 18.9, 809–818
Forecasting of diesel and petrol sales: an evaluation of various marketing strategies. *B.W. Ang and K.C. Tan*. 18.3, 246–254
India's oil policy: to import crudes or products? *Kapil Thukral*. 18.4, 368–380
Integration of the natural gas market in Western Europe. *Ronald J. Hopper, Jesper Munkegaard and Uffe Bungaard-Jorgensen*. 18.1, 86–91
Introduction to John Gault and associates. *Paul Tempest*. 18.1, 72
Long-term evolution of oil prices: 1860–1987. *Carlos E. Suárez*. 18.2, 170–174
Norwegian gas exports: past policy, current prospects and future options. *Jonathan P. Stern*. 18.1, 55–60
Oil prices in the short, medium and long-term. *Fereidun Fesharaki*. 18.1, 66–71
OPEC production quotas and their application to non-OPEC countries. *John Gault, Bahman Karbassioun, Charles Spierer and Jean-Luc Bertholet*. 18.1, 73–78
The development of Orimulsion and Venezuelan oil strategy. *Francis McGowan*. 18.10, 913–926
The future of world oil prices: smooth growth or volatility? *Franz Wirl*. 18.8, 756–763
The Spanish oil sector: from state intervention to free trade. *Aad Correljé*. 18.8, 747–755
Towards an effective oil conservation policy: a case study for OPEC. *Mohamed Shams*. 18.5, 443–448
USSR oil and gas industry training: systems in higher education. *V.N. Vinogradov and B.P. Porshakov*. 18.10, 945–948

Renewables

Consumption of fuelwood and other household cooking fuels in Indian cities. *J. Dunkerley, M. Macauley, M. Naimuddin and P.C. Agarwal*. 18.1, 92–99
Iron and charcoal: the industrial fuelwood crisis in Minas Gerais. *Frank Ackerman and Paulo Eduardo Fernandes de Almeida*. 18.7, 661–668
Residential wood combustion for space heating in the Pacific northwest: difficulties for electric utilities? *Bruce E. Tonn and Dennis L. White*. 18.3, 283–292
Tax credits and US solar commercialization policy. *Daniel Rich and J. David Roessner*. 18.2, 186–198
The Cinderella options: a study of modernized renewable energy technologies: Part 1 – A technical assessment. *M.J. Grubb*. 18.6, 525–542
The Cinderella options: a study of modernized renewable energy technologies; Part 2 – Political and policy analysis. *M.J. Grubb*. 18.8, 711–725
Urban fuelwood: challenges and dilemmas. *John Soussan, Phil O'Keefe and Barry Munslow*. 18.6, 575–582

Leaders

1990: is this the third oil shock? *Walter Goldstein*. 18.8, 686–688
EC restrictions to nuclear subsidy. *Fiona Reynolds*. 18.7, 590–592
Environmental problems and energy systems. *Adam Kahane*. 18.2, 134–136
Oil in the 1990s. *Sheikh Ahmed Zaki Yamani*. 18.3, 223–227
The case for a national energy policy. *Tony Benn*. 18.4, 310–311
Uranium: do leave it in the ground! *Peter Bunyard*. 18.8, 689–691

Communications on energy

A global agenda for clean air. *Hilary F. French*. 18.6, 583–585
An international tax on pollution and natural resource depletion. *Thomas Sterner*. 18.3, 300–302
CO_2 abatement cost in West Germany. *Felix Conrad*. 18.7, 669–671
Eastern Europe and energy projects. *Matthew Rodda*. 18.2, 201–202
Electricity forecasting. *John K. Stutz*. 18.3, 303–304
Energy conservation policies. *Geoffrey Greenhalgh*. 18.3, 293–299
Energy efficiency and economic fallacies. *M.J. Grubb*. 18.8, 783–785
Increasing energy supply not inevitable. *Dave Toke*. 18.7, 671–673
Keepin and Kats: a comment. *Edwin M. Kinderman and William J. Schumacher*. 18.4, 389–394
Methane leakage from natural gas. *P.A. Okken*. 18.2, 202–204
PRC . . . an energy exporter? Rejoinder. *Larry Chuen-ho Chow*. 18.5, 482–484
Reducing traffic congestion and its impact on transport energy use in Singapore. *B.W. Ang*. 18.9, 871–874
The assessment of fusion power. *Roy Bickerton*. 18.5, 480–482
The greenhouse effect: the fallacies in the energy efficiency solution. *Len Brookes*. 18.2, 199–201

Viewpoints

Can nuclear energy contribute to slowing global warming? *Jan Murray*. 18.6, 494–499
Denmark's energy future. *John Hebo Nielsen*. 18.1, 80–85
Does nuclear power have a future? *Colin Sweet*. 18.5, 406–422
Energy: coping with risk. *José Goldemberg*. 18.3, 228–232
Environmental information for all: the need for a monthly index. *Chris Hope and Jon Parker*. 18.4, 312–319
Farewell to 1992? *Jonathan P. Stern*. 18.10, 886–887
It is energy we need not electricity. *Norman Jenkins*. 18.5, 423–427
Socialist transformation: energy exports from centrally planned economies. *Marian Radetzki*. 18.9, 806–808
Soviet energy: the uncertain 1990s. *Mikhail B. Korchemkin*. 18.5, 399–405
The new Europe and the Middle East: scenarios for energy planning. *Peter Oppenheimer*. 18.9, 798–805
The role of the automobile: future transportation, environmental and energy needs. *Deborah Lynn Bleviss*. 18.2, 137–148
The supply and demand for oil in the 1990s: will the forecasters alone make money? *Walter Goldstein*. 18.7, 593–595
Two cheers for EC energy and environmental policy. *Chris Hope and Susan Owens*. 18.7, 596–598
Worlds in collision. *Andrew MacKillop*. 18.8, 692–693

Conference reports

Are energy and environmental energy one and the same thing?, BIEE Seminar, Chatham House, London, UK, 8 June 1990. *Sonja Boehmer-Christiansen*. 18.7, 677–678
British Nuclear Energy Society conference on 'Radioactive waste management 2', Brighton, UK, 2–5 May 1989. *Frans Berkhout*. 18.8, 791–792
Combined Heat and Power Association conference, Harrogate, UK, 16–18 October, 1989. *David Jones*. 18.2, 205–207
Energy and environment: a new climate, IMechE Environmental Engineering Group seminar, London, UK, 16 November 1989. *Sonja Boehmer-Christiansen*. 18.2, 205
Energy for a new century: the European perspective, Brussels, Belgium, 3–4 May 1990. *David Jones*. 18.9, 876–877
Energy Law '90, Ninth Biennial Seminar of the International Bar Association's Section on Energy and Natural Resources Law (IBA SERL), Leeuwenhorst Congres Center, Noordwijkerhout, Netherlands, 22–27 April 1990. *David N. Zillman*. 18.7, 674–675
Gas and project planning in the Third World, Cambridge Energy Research Group, Cavendish Laboratory, Cambridge, UK, 30 September 1988. *Peter Pearson*. 18.1, 117–118
Ninth International Congress on Energy and the Environment, Clean Energy Institute, University of Miami, USA, 13–15 December 1989. *Alexi Clarke*. 18.5, 486–487
The membrane alternative and its implications for industry, University of Bath, Bath, UK, 29–30 March 1989. *Norman Jenkins*. 18.2, 207–208
The role of government in energy, The Institution of Mechanical Engineers, London, UK, 29 March 1990. *Sonja A. Boehmer-Christiansen*. 18.9, 875–876
Twelfth Annual International conference of the IAEE, New Delhi, India, 4–6 January 1990. *R.K. Pachauri*. 18.7, 675–677

Book reviews

Blueprint for a Green Economy by D. Pearce *et al* (Tim Jackson). 18.1, 118–121
Biogas End-use in the European Community by M. Constant, H. Naveau, G-L. Ferrero and E-J. Nyns (Chris Lewis). 18.2, 213–214
Biomass Management: Woody Biomass in the SADCC Region by Andrew Millington and John Townshend (Chris Lewis). 18.2, 213–214
Electricity End-use Efficiency by The International Energy Agency (Eric Hirst). 18.3, 305–306
Electricity in Europe: Power and Profit by Andrew Holmes (Arthur Conway). 18.8, 786–787
Energy Conservation Trends: Understanding the Factors that Affect Conservation Gains in the US Economy by the US Dept of Energy (David Jones). 18.7, 679–680
Fossil Fuel Consumption and the Environment by Ann Davison (Jim Skea). 18.1, 126–127
Generating Failure: Public Power Policy in the Northwest by David L. Shapiro (Eric Hirst). 18.3, 305–306
International Environmental Diplomacy: The Management and Resolution of Transfrontier Environmental Problems ed by John E. Carroll (Jim Skea). 18.1, 123–124
In the Absence of Competition: A Consum-

er View of Public Utilities Regulation by The National Consumer Council (Francis McGowan). 18.1, 122–123

L'Europe des Surregenerateurs by Klaus-Gerd Giesen (Guy de Carmoy). 18.9, 879–880

New Transportation Fuels: A Strategic Approach to Technological Change by Daniel Sperling (Stewart Boyle). 18.8, 787–789

Nuclear Decommissioning and Society: Public Links to a New Technology ed by Martin J. Pasqualetti (Steve Thomas). 18.10, 965

Oil in the World Economy ed by R.W. Ferrier and A. Fursenko (Paul Tempest). 18.2, 212–213

OPEC: Twenty-five Years of Prices and Politics by Ian Skeet (Michael Morrison). 18.5, 487–488

Petroleum Rent Collection Around the World by Alexander Kemp (Ian Smart). 18.1, 124

Photovoltaic Demonstration Projects 2 ed by W.B. Gillet, R.J. Hacker and W. Kraut (Norman Jenkins). 18.4, 395

Regulating Utilities in an Era of Deregulation ed by Michael A. Crew (Eric Hirst). 18.3, 305–306

Shale Barrel Politics: Energy and Legislative Leadership by Eric M. Uslaner (Warren Donnelly). 18.1, 121–122

Social Costs of Energy Consumption: External Effects of Electricity Generation in the Federal Republic of Germany by Olav Hohmeyer (Ronald Stewart). 18.10, 965–966

Solar Hydrogen: Moving Beyond Fossil Fuels by Joan M. Ogden and Robert H. Williams (Cleland McVeigh). 18.2, 208–209

Stability Within Uncertainty: Evolution of the World Oil Market by A.E. Reinsch, K.L. Brown and J.O. Stanford (Michael Morrison). 18.5, 487–488

The Demise of Nuclear Energy? Lessons for Democratic Control of Technology, by J.G. Moore and E.J. Woodhouse (Tim Jackson). 18.2, 210–211

The Economy of the Earth: Philosophy, Law and the Environment by Mark Sagoff (Tim Jackson). 18.8, 789–791

The Future of the Gulf: Politics and Oil in the 1990s by Philip Robins (Paul Stevens). 18.4, 394–395

The Greenhouse Effect: A Practical Guide to the World's Changing Climate by Stewart Boyle and John Ardill (Michael Grubb). 18.1, 125–126

The Greenhouse Effect: Negotiating Targets by Michael Grubb (Timothy O'Riordan). 18.7, 678–679

The Invisible Bomb: The Nuclear Arms Race in the Middle East by Frank Barnaby (Warren Donnelly). 18.2, 211–212

The Mirage of Oil Protection by Robert L. Bradley Jr (David L. Shapiro). 18.7, 680–681

The Politics of Environment in the Federal Republic of Germany: Forests V Fossil Fuels by Sonja Boehmer-Christiansen (Stewart Boyle). 18.9, 878–879

Climate research review

18.5, 485–486; 18.6, 585–587; 18.7, 681–682; 18.8, 793–794; 18.9, 880–881; 18.10, 962–964

Letters to the editor

18.1, 127; 18.2, 214–215; 18.5, 480; 18.8, 786; 18.10, 964

Meetings on energy

18.1, 129–130; 18.2, 216–217; 18.4, 396; 18.5, 489–490; 18.6, 588; 18.7, 683–684; 18.8, 795–796; 18.9, 883; 18.10, IBC

Publications received

18.1, 128–129; 18.2, 215–216; 18.4, 395–396; 18.5, 488–489; 18.6, 588; 18.7, 683; 18.8, 795; 18.9, 882; 18.10, 966

Index to Volume 18

18.10, 967–971
